2. Advertise Detail
3. Dynamic Advertise Listing Fields
4. Plans
5. Promotions
6. Customer Dashboard
7. Seller Dashboard
8. Feedback Module
9. Wishlist Module
10. Inbox Module
11. Make an offer module
12. Profile Settings
13. Chat System
14. Content Pages
15. Login / Register

16. Email Notifications

17. Blog Module

1- Categories:

Dynamic and nested categories with seo friendly urls. You can create categories and sub categories as much as you need from the backend.

2- Advertise Detail:

Ad Detail page with gallery, detail, show phone and make an offer feature.

3- Dynamic Advertise Listing Fields:

You can create the fields related to the categories from the backend and the fields will be shown on the ad posting form.

4- Plans:

You can create the different pricing plans according to the categories. The plans will be listed down on when a seller going to post the ad. Plans will be charged via Stripe Payment Gateway. Seller can change their plans from their dashboard.

5- Promotions Module:

You can create the promotions from the backend. That promotions will be shown on different areas of the website.

6- Customer Dashboard:

Where the customer can manage their wish list, messages, offers and profile.

7- Seller Dashboard:

Where the seller can manage their ad listings, wish lists, messages, offers profile and see their progress reports as well.

8- Feedback Module:

Feedback module is where seller can create and send feedback links to their customers in order to receive the feedback of their ads.

9- Wishlist Module:

Where the customer and seller both can Wishlist their desire ads for future.

10- Inbox Module:

Where seller receive the offers and messages from their customers.

11- Make an offer module:

Where customer can make an offer with pre-provided options as well.

12- Profile Settings:

Where Customers and Sellers can change their passwords and necessary details of their profiles.

13- Chat System:

Realtime chatting system between customer and seller with the pusher api.

14- Content Pages:

These pages are including about us, privacy policies, FAQs, terms and conditions and how it works etc.

15- Login / Register:

Login and Register forms with social authentications like login with Google.

16- Email Notifications:

All the necessary email templates will be integrated for admins, sellers and customers.

17- Blog Module:

Blog module will be provided with the SEO fields and frontend with SEO optimized pages.
